

JACKSON ENERGY AUTHORITY
INDEX GAS RATE SCHEDULE CNG - 1

AVAILABILITY

This schedule is available for gas service to any commercial customer using natural gas exclusively for the purpose of fueling commercial or personal vehicles.

BILLING UNITS

Gas supplied under this schedule will be measured in units of one hundred cubic feet (CCF) corrected to a pressure base of 14.65 psig, then converted to therms based on the heat content of one CCF. Billing units will be therms.

MONTHLY RATE

Commodity Charge Index Price plus \$1.90 per MMBtu (\$0.190 per therm)

Index Price shall mean the price per MMBtu for the first of the month delivery, as published in the first issue of the month (including corrections in later issues) with respect to which the payment is being made of Platts' Inside FERC's Gas Market Report, a publication of The McGraw-Hill Companies, Inc., in the section "Prices of Spot Gas Delivered to Pipelines," under the heading "Texas Gas Transmission Corp., Zone SL." If Platts' Inside FERC's Gas Market Report should fail to publish a price for the month or cease to publish entirely, the price shall be set forth in a mutually agreed upon alternative index.

PAYMENT

Bills under this rate schedule will be rendered monthly. Any amount of bill unpaid after due date specified on bill may be subject to additional charges under Jackson Energy Authority's standard policy.

CONTRACT REQUIREMENT

Customers taking service under this rate schedule will be required to execute written contracts for a period of not less than one year.

SINGLE-POINT DELIVERY

The above rates are based upon the supply of service to the customer's premises through a single delivery and metering point, and at a single pressure. Separate supply for the same customer at other points of consumption, or at different pressures, shall be separately metered and billed.

Service under this schedule is subject to Policies and Procedures of the Jackson Energy Authority.

Effective December 1, 2012
